

# The Power of Savings. Guaranteed.

Ambit's Guaranteed Savings Plan (GSP) is a great way for customers to save money on their energy supply charges for the specified period. Here are some of the details of the plan you can share with your customers to make sure it's the right choice for them.

## The Savings.

Depending on your market, customers save a designated % compared to what they would have paid for electric or gas supply from their local utility for the specified period.

## How to Qualify.

In most markets, the customer must be on the GSP for 24 consecutive months to qualify. At the end of the specified period, the customer will have no further guarantee of savings unless they select a new GSP.

## The Guarantee.

If we don't meet or beat our promised savings, we'll send the customer a refund or apply a discount to their bill usually within three months of the completion of their savings period.

## Ups and Downs.

The GSP is a variable plan. It's important to explain that over the life of their plan, the monthly rate may at times be higher than the local utility's. But overall, Ambit's GSP will be lower over the specified period. Or we'll compensate them with a refund. If a customer remains on the GSP for the entirety of the specified period, they will receive a savings compared to what they would have paid the utility over that period.

## A Few Exceptions.

If a customer is classified as qualifying for Residential Heating (RH), it's possible they will not qualify for savings under the GSP because the RH rate is lower than the standard rate. Other factors, such as a Free Energy, utility fees, taxes and other charges may impact their final bill.

## More Information.

You can learn more about the GSP by visiting [faq.ambitenergy.com](https://faq.ambitenergy.com) and clicking on the Guaranteed Savings Plan tab at the bottom of the page.
