

Ambit Green Northeast products are certified by Green-e® Energy and match 100% of your monthly electricity usage. The table below provides the Ambit Green Northeast renewable resource mix in 2024, as well as the projected resource mix for 2024/2025.

Product Content Label

Renewable Energy Source	2024 Historical mix (location)	2024/2025 Projected mix (locations)
Wind	100% (ND)	100% (Within the U.S.)

Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased. Historical figures reflect the power delivered to Ambit Green Northeast customers in 2024.

Ambit Green Northeast is a Renewable Energy Certificate (REC) product and does not contain electricity. Your purchase of Renewable Energy Certificates (RECs) supports renewable electricity production in the region of generation. For every unit of renewable electricity generated, an equivalent amount of RECs is produced, and by purchasing and pairing RECs with your electricity service you are using and receiving the benefits of that renewable electricity. Your REC purchase also helps build a market for renewable electricity. Increased demand for, and generation of, renewable electricity helps reduce conventional electricity generation in the region where the renewable electricity generator is located. It also has other local and global environmental benefits, which may include emitting little or no regional air pollution or carbon dioxide.

New renewables come from generation facilities that first began commercial operation within the last 15 years. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, visit green-e.org/rec.

For comparison, the 2023 average mix of resources supplying the U.S. includes: Coal (0%), Nuclear (23%), Oil (1%), Natural Gas (50%), Hydroelectric (16%), Wind (4%), Biomass (2%), Solar (2%) and Other (2%). (Source: US Environmental Protection Agency, eGRID). The average U.S. home uses 578 kWh per month (Source: U.S. EIA, 2023).

Green-e Energy certifies that Ambit Green Northeast meets the environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information on Green-e Energy or the certification requirements, visit green-e.org.
