

# Texas Product Content Label

Ambit Green Texas products are certified by Green-e® Energy and match 100% of your monthly electricity usage. The table below provides the Ambit Green Texas renewable resource mix in 2024, as well as the projected resource mix for 2025/2026.

## Product Content Label

Renewable Energy Source	2024 Historical mix (location)	2025/2026 Projected mix (location)
Wind	100% (TX)	100% (TX)

Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased. Historical figures reflect the power delivered to Ambit Green Texas customers in 2024.

New renewables come from generation facilities that first began commercial operation within the last 15 years. This product includes generation from a facility that is approved under a strict set of criteria as repowered. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, visit [green-e.org/rec](http://green-e.org/rec).

For comparison, the 2023 average mix of resources supplying the Texas region includes: Coal (13%), Nuclear (8%), Oil (0%), Natural Gas (51%), Hydroelectric (0%), Wind (22%), Biomass (0%), Other (1%), and Solar (5%). (Source: US Environmental Protection Agency, eGRID). The average home in the region uses 1,146 kWh per month (Source: U.S. EIA, 2023).

Green-e Energy certifies that Ambit Green Texas meets the environmental and consumer protection standards established by the non-profit Center for Resource Solutions.
